Profile

over 2 years of experience as a Flutter Developer, specializing in mobile application development, UI/UX design, and state management. Proven ability to lead end-to-end app development, integrate real-time services, and enhance app functionality with a focus on user experience and performance. Skilled in cross-functional collaboration, mentoring junior developers, and delivering high-quality solutions in a fast-paced environment.

WORK HISTORY

Mobile App Developer (Flutter & Dart)

HomeTecs – Full-time, Onsite (Homs, Syria)

Jun 2025 – Present

AutoLakta: A customer cars e-commerce app featuring multiple brands, and a wide range of models, add – edit and delete car, advanced search and filtering cars.

Google Drive: https://drive.google.com/file/d/1jGm6IMFIEM0tW8BRAD-Sg6PCHSa0p-wg/view?usp=drive_link

Ovacs: is an advanced web and mobile application designed for legal professionals, law firms, and related organizations to efficiently manage, archive, and collaborate on legal cases, sessions, clients, and documents. The app's mission is to empower legal professionals by providing cutting-edge solutions for secure and efficient archiving, ensuring quick access to vital files and unparalleled data integrity.

Mobile App Developer (Flutter & Dart)

FH Team – Full-time, Onsite (Homs, Syria)

May 2025 – August 2025

- 3alamkashouf (Currency Exchange Deal Finder): A user-centric app that allows users to request currency exchange (e.g., USD to SYP or other currencies). The app helps users find and connect with nearby individuals offering exchange deals, ensuring the best rate from the closest location through direct peer-to-peer communication.

Mobile App Developer (Flutter & Dart)

Beta – Full-time, Onsite (Homs, Syria)

April 2025 – August 2025

Worked on a variety of mobile applications targeting different industries and user groups, contributing to design, development, and feature integration:

- VPN Connect: A VPN client app that connects users to a remote VPN server, allowing them to access the internet securely through the connected server.
- Abo Nouh (Gold Balances Application): A mobile app for a small gold store that tracks gold transactions and displays inventory in real time, functioning also as a mini e-commerce solution for gold products.
- Alwahi Almubar (Islamic Religious Curricula Training App): An educational platform designed for Quran and Hadith memorization for girls. The app supports three types of users: student, teacher (female-only), and admin, with role-based functionality and content access.
- Exos (Multi-Service App): A multi-functional application offering various services. Currently, it includes sections for movies, TV series, live matches, and TV channels.
- Gym Management App: A business management application designed for gym owners to manage expenses, staff, invoices, and product inventory. The system supports three user roles: admin, employee, and user, each with specific access and features.
- Sooqcom: Developed a classified ads mobile application where users can post items for sale, featuring admin approval workflow, real-time chat, favorites management, and a photo gallery.
